

## Canadian Critical Care Conference 2020

### Nursing Workshop

Educators from Vancouver General Hospitals Emergency Department (ED) and Intensive Care Unit (ICU) will facilitate an innovative workshop specifically designed for nurses, focused on essential topics from the 2020 conference speakers. The workshop will begin with an engaging discussion on the management, treatment, and cardiac implications related to pulmonary embolism (PE). Opportunity will then be given to consolidate findings in a simulated environment. Participants will be split into small groups for first-hand experience with an evolving critically ill patient who they follow from the initial presentation in the ED to the ICU. This one of a kind nursing workshop will address the challenges of providing appropriate care in the most effective and efficient manner to a critically ill patient, in addition key considerations during intra hospital transfers will be discussed. The session will close with a discussion on the promotion of the health and well-being amongst nurses working in speciality areas. This workshop will allow nurses the opportunity to develop knowledge and skills, while fostering team dynamics.

#### Objectives

1. Identification and recognition of a deteriorating patient
2. Appropriately manage and treat PE
3. Understand cardiac implications of PE
4. Identify and discuss considerations for intra hospital patients transfers
5. Promoting health and wellbeing amongst specialty nursing

**This session requires advanced registration. It is limited to a small group to enhance your experience. It is interactive and involves simulation.**
